To Whom It May Concern,

How timely that I should be asked to comment on the Presidents' Inter-Agency Council on Food Safety. New York State is currently in the midst of a serious outbreak of E.coli infection. The source is thought to be from cattle waste that somehow got into the water supply at several county fairs.

Is it important to consider food safety from the farm to the consumer? What more evidence do you need? Waste management in the farming industry needs to be addressed as part of this plan.

Sincerely,

Marianne Annibali
